The Exclusive Right is a definite life intangible asset and relates to a 10-year exclusive bancassurance agreement entered between the Company and Alliance Bank Malaysia Berhad ("ABMB") on 13 June 2013. The Exclusive Right is amortised over the duration of the agreement and the annual amortisation amount is calculated with reference to the benefits generated from the partnership (which is defined as the annualized premium equivalent) in which the Company expects to recognise the related revenue.

The Distribution Agreement relates to a 20-year distribution right entered between the Company and an agency leadership corporation on 23 September 2019. The Distribution Agreement is amortised over the duration of the agreement and the annual amortisation amount is calculated based on the consumption pattern of the distribution, which is the contracted number of agents.

Current tax asset	22,245	23,192
Current tax liability	<u>(20,580)</u> 1,665	<u>(22,245)</u> 947

Included in the current tax assets are a pending appeal case arising from two notices of additional assessment ("Forms JA") of RM22.2 million for years of assessment ("YA") 2017 and 2018, and tax paid in excess to the Inland Revenue Board ("IRB"). The High Court rejected the Company's application for leave to apply for judicial review in a decision delivered on 14th July 2021. The Company will not be appealing against the decision of the High Court. A hearing date for the Company's application to the Special Commissioner of Income Tax ("SCIT") on the assessments has yet to be fixed.

The Company has made above tax payment in 2021. In line with the opinion by the external advisor, the Company believes strongly that there are good grounds to contest the additional assessment and hence has treated the above tax payment as tax recoverable.

#### 20. DETERMINATION OF FAIR VALUES AND FAIR VALUE HIERARCHY

#### a) Freehold property and investment property

The fair value of the Company's freehold property and investment property is determined based on the income method conducted by an independent qualified valuer.

Under the income method, the market value of the properties is determined based on the net annual income which is derived by deducting the annual outgoings from the gross annual income and capitalising the net income by a suitable rate of return consistent with the type and quality of the investment.

#### Fair value hierarchy

A level is assigned to each fair value measurement based on the lowest level input significant to the fair value measurement in its entirety. The three-level hierarchy is defined as follows:-

- Level 1 Fair value is derived from unadjusted quoted price in active markets for identical properties that the entity can access at the measurement date.
- Level 2 Fair value is estimated using inputs that are observable for the properties, either directly or indirectly.
- Level 3 Fair value is estimated using unobservable inputs for the properties.

The fair value of freehold property and investment property is classified within Level 3 of the fair value hierarchy. The fair value of the properties is as follows:

	Freehold property		Investment property	
	As at 30.06.2021 RM'000	As at 31.12.2020 RM'000	As at 30.06.2021 RM'000	As at 31.12.2020 RM'000

Fair value as stated in valuation report*	10,604	10,604	46,802	46,802

<sup>\*</sup> Based on the valuation conducted by an independent qualified valuer as at 31 December 2020.

Description of valuation techniques used and significant unobservable inputs to valuation of freehold properties and investment properties:

	Valuation technique	Significant unobservable inputs	Range
2020			
Freehold/	Income	Term period's net yield	5.00% - 6.50%
investment	method	Reversionary period's net yield	6.00%

#### 20. DETERMINATION OF FAIR VALUES AND FAIR VALUE HIERARCHY (CONTINUED)

#### a) Freehold property and investment property (continued)

Significant increase or decrease in each of the unobservable inputs used in the valuation would result in a correspondingly higher or lower fair value of the properties.

The reconciliation from beginning to ending balances for the freehold property and investment property are as follows:

#### b) Financial assets and financial liabilities

### (i) Determination of fair values

The fair values of the Company's financial assets and financial liabilities are determined as follows:

- (i) The carrying amounts of financial assets and financial liabilities, such as loans and receivables, insurance receivables, cash and cash equivalents, insurance payables and other payables (other than amount payable under Distribution Agreement) are reasonable approximations of their fair values due to the relatively short term maturity of these balances and the immaterial impact of discounting;
- (ii) The carrying amount of amount payable under Distribution Agreement discounted using the discount rate that reflects the current market assessment of the time value of money, are reasonable approximations of their fair values;
- (iii) The fair values of quoted equities and investments in real estate investment trusts are based on quoted market prices as at the reporting date;
- (iv) The fair values of Malaysian Government Securities, Government Investment Issues and unquoted corporate debt securities are based on indicative market prices;

#### (i) Determination of fair values

The fair values of the Company's financial assets and financial liabilities are determined as follows: (continued)

(viii) The fair values of private equities are measured based on private equities' net asset value or fair values reported in investees' financial statements as a measure of fair value.

#### (ii) Fair value hierarchy

The Company categorises its fair value measurements according to a three-level hierarchy. The hierarchy prioritises the inputs used by the Company's valuation techniques for determining the fair value of the financial instruments.

A level is assigned to each fair value measurement based on the lowest level input significant to the fair value measurement in its entirety. The three-level hierarchy is defined as follows:

- Level 1 Fair value measurements that reflect unadjusted, quoted prices in active markets for identical assets and liabilities that the Company has the ability to access at the measurement date. Valuations are based on quoted prices reflecting market transactions involving assets or liabilities identical to those being measured.
- Level 2 Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, inputs that are observable that are not prices (such as interest rates, credit risks, etc.) and inputs that are derived from or corroborated by observable market data.
- Level 3 Fair value measurements using significant non-market observable inputs. These include valuations for assets and liabilities that are derived using data, some or all of which is not market observable, including assumptions about risk.

In determining the fair value of its financial instruments, the Company uses observable market data, when available, and minimises the use of unobservable inputs to the extent possible when determining fair value.
