**NOTES TO THE UNAUDITED CONDENSED INTERIM FINANCIAL STATEMENTS
(CONTINUED)****18. DETERMINATION OF FAIR VALUES AND FAIR VALUE HIERARCHY****a) Freehold property and investment property**

The fair value of the Company's freehold property and investment property is determined based on the income method conducted by an independent qualified valuer.

Under the income method, the market value of the properties is determined based on the net annual income which is derived by deducting the annual outgoings from the gross annual income and capitalising the net income by a suitable rate of return consistent with the type and quality of the investment.

Fair value hierarchy

A level is assigned to each fair value measurement based on the lowest level input significant to the fair value measurement in its entirety. The three-level hierarchy is defined as follows:-

Level 1 – Fair value is derived from unadjusted quoted price in active markets for identical properties that the entity can access at the measurement date.

Level 2 – Fair value is estimated using inputs that are observable for the properties, either directly or indirectly.

Level 3 – Fair value is estimated using unobservable inputs for the properties.

The fair value of freehold property and investment property is classified within Level 3 of the fair value hierarchy. The fair value of the properties is as follows:

	Freehold property		Investment property	
	As at 30.06.2016 RM'000	As at 31.12.2015 RM'000	As at 30.06.2016 RM'000	As at 31.12.2015 RM'000
Carrying amount	10,169	10,330	51,320	51,320
Fair value as stated in valuation report*	10,330	10,330	51,320	51,320
Last recognised revalued amount	10,330	10,330	51,320	51,320

* Based on the valuation conducted by an independent qualified valuer as at 31 December 2015.

Description of valuation techniques used and significant unobservable inputs to valuation of freehold properties and investment properties:

	Valuation technique	Significant unobservable inputs	Range
2015			
Freehold/ investment property	Income method	Term's period net yield	6.00%
		Reversionary period's net yield	6.25%
		Void factor	5.00%
		Average rental for term period	RM4.29 - RM4.80 psf
		Average rental for reversionary period	RM4.60 psf

(CONTINUED)****18. DETERMINATION OF FAIR VALUES AND FAIR VALUE HIERARCHY (CONTINUED)****a) Freehold property and investment property (continued)**

Significant increase or decrease in each of the unobservable inputs used in the valuation would result in a correspondingly higher or lower fair value of the properties.

The reconciliation from beginning to ending balances for the freehold property and investment property are as follows:

	Freehold property		Investment property	
	2016	2015	2016	2015
	RM'000	RM'000	RM'000	RM'000

b) Financial assets and financial liabilities**(i) Determination of fair values**

The fair values of the Company's financial assets and financial liabilities are determined as follows:

- (i) The carrying amounts of financial assets and financial liabilities, such as loans and receivables, insurance receivables, cash and bank balances, insurance payables and other payables, are reasonable approximations of their fair values due to the relatively short term maturity of these balances;
- (ii) The fair values of quoted equities are based on quoted market prices as at the reporting date;
- (iii) The fair values of Malaysian Government Securities, Government Investment Issues and unquoted corporate debt securities are based on indicative market prices;
- (iv) The fair values of negotiable instruments of deposit are calculated using the discounted cash flow method based on the maturity of the instruments at discount rates representing the average market rates quoted by at least two licensed banks;
- (v) The fair values of investments in mutual funds, unit trust funds and real estate investment trusts are valued based on the net asset values of the underlying funds as at the reporting date; and
- (vi) The fair values of foreign exchange forward contracts are based on valuations provided by the financial institutions making reference to quoted market prices.

18. DETERMINATION OF FAIR VALUES AND FAIR VALUE HIERARCHY (CONTINUED)

b) Financial assets and financial liabilities (continued)

(ii) Fair value hierarchy (continued)

The Company categorises its fair value measurements according to a three-level hierarchy. The hierarchy prioritises the inputs used by the Company's valuation techniques for determining the fair value of the financial instruments.

A level is assigned to each fair value measurement based on the lowest level input significant to the fair value measurement in its entirety. The three-level hierarchy is defined as follows:

Level 1 – Fair value measurements that reflect unadjusted, quoted prices in active markets for identical assets and liabilities that the Company has the ability to access at the measurement date. Valuations are based on quoted prices reflecting market transactions involving assets or liabilities identical to those being measured.

Level 2 – Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, inputs that are observable that are not prices (such as interest rates, credit risks, etc) and inputs that are derived from or corroborated by observable market data.

Level 3 – Fair value measurements using significant non market observable inputs. These include valuations for assets and liabilities that are derived using data, some or all of which is not market observable, including assumptions about risk.

In determining the fair value of its financial instruments, the Company uses observable market data, when available, and minimises the use of unobservable inputs to the extent possible when determining fair value.
